Water Smart Pledge

When placed in guest rooms the Linen Exchange Program - Water Smart cards may save hotels water, energy, detergent, labor, wear and tear on equipment and linens. In addition the residue from using tons of detergent is kept out of our waste treatment facility. A reader's poll in a recent National Geographic Traveler concerning linen cards resulted in an overwhelming majority responding that they would be willing to save water and energy by reusing towels and sheets during a hotel stay.

Play Your Part... Pledge to participate as a Water Smart Community Partner – We will pledge to support management - site specific water utility knowledge.

By placing linen cards in rooms, your facility encourages, supports and promotes ecological awareness in the hospitality industry. General managers, executive housekeepers and chief engineers generally do not have time to seek out the many ways to conserve water and energy; our community has devoted itself to that important task. (Source: Green Hotels Association®)

Note: It is critical that housekeeping receive a 20 minute Water Smart Program Introduction and Instructions to Participate. Allow guests to **MAKE A DIFFERENCE** by Water Smart Training housekeeping. **Place and Replace Smart Cards.**
