## **ADDENDUM NO. 1**

The City of Prescott would like to issue a clarification as to the type of garbage we have at the City of Prescott Transfer Station. This information may be critical in the selection of trailers purchased for use in this contract. The City recommends a trailer that is structurally sound to haul residential, commercial, and self haul garbage. In addition, a crane will be used to compact the garbage to achieve adequate weight. The City will not be responsible for damage to the trailer during operation. It should be also noted that trailers that do not have reinforced sides and start to bow out could be in violation of an oversized load restriction. This would be solely the vendor's responsibility.

The City recommends to bidders: Bid this contract with a consciousness of the fuel market. Upon entering a contract, the City will give a fuel surcharge for fuel usage in this contract over \$4.00 per gallon, based on the Opis 5-day average price, Pad 4 for Phoenix. Fuel surcharge will be based on the number of trips to the landfill and will be paid quarterly. Failure to agree on a fuel surcharge by either party may negate this contract.
