ADDENDUM NUMBER ONE
to the
Request for Proposals
for
Solar Photovoltaic Electric Generating Systems Project
CIP Number 15-039

DATE OF ADDENDUM: **December 7, 2015**

BID OPENING: **December 10, 2015 at 2:00 PM, MST (POSTPONED)**

AMENDED BID OPENING: **January 7, 2016 at 2:00 PM, MST**

TO ALL BIDDERS BIDDING ON THE ABOVE PROJECT:

The following addendum shall be made part of the Contract Documents. All other provisions of the Contract Documents remain unchanged. The Bidder shall acknowledge receipt of this addendum on page 13 of the Proposal by inserting the addendum number and date on the executed page of the Proposal. The contents of this Addendum shall be given full consideration in the preparation of the Bid.

ADDENDUM

1. For the Request for Proposals, Page 3, Section A, at the end of the first paragraph add, "The City will accept proposals for any or all sites from proposers."

2. On Page 10 Under Scope of Work delete the paragraph:

~~SCOPE OF WORK~~
~~The proposal must provide for complete cost-effective, solar photovoltaic (PV) energy systems including financing, design, engineering, procurement, installation, operation and maintenance, utility coordination and interconnect agreement, including all labor and materials and any temporary or interim facilities required to maintain essential existing functions in operation throughout the PPA contract period. The awarded proposer will be entitled to all eligible tax credits and incentives and is expected to factor those tax credits and rebates into the proposed pricing.~~

Replace paragraph with the paragraph below:

SCOPE OF WORK
The proposal must provide for complete cost-effective, solar photovoltaic (PV) energy systems including financing, design, engineering, obtaining all required permitting, required environmental assessments (for the Chino Valley Water Facility and Well No. 3 and 4), providing public relations, procurement, installation,

operation and maintenance, utility coordination and interconnect agreement, including all labor and materials and any temporary or interim facilities required to maintain essential existing functions in operation throughout the PPA contract period. The awarded proposer will be entitled to all eligible tax credits and incentives and is expected to factor those tax credits and rebates into the proposed pricing.

3. Exhibit A has been added, which includes one line electrical diagrams showing service tie in locations for the solar feed at the Airport Water Reclamation Facility.

4. Exhibit B has been added, which includes the past 12 months of billing for each site.

5. Additional questions can be submitted to the close of business (5:00 PM) on Friday, December 11, 2015. The City will return responses to questions, no later than close of business on Friday, December 18, 2015.

CLARIFICATIONS

General
Will the City be able to provide answers to the questions submitted prior to December 7th? Answers to the questions will be critical to the preliminary design of the systems and will inform our bid.

The City will extend the request for proposals opening to January 7, 2016 to allow the proposers additional time to consider information supplied from the questions.

On Form E Section 4, the City requests a letter of commitment from all subcontractors. Will the City allow for a list of subcontractors without the letter?

Any subcontractors listed shall provide a letter of commitment to the project team as stated in Form E, Section 4. A letter of commitment is not a contract; it is statement of the subcontractor's commitment to perform the services subcontracted.

Public Works and Engineering
Are we able to drop the two sites at 430 and 433 N Virginia Street?

The RFP notes that proposers can respond to any or all of the sites identified in the RFP.

If not, what type of roof construction was used for these two buildings?

The City was only envisioning the use of parking lot mounted systems.

How old are the roofs?

N/A

How long is left on the roofs' warranties?

NA

Can you provide as-builts of the rooftops?

N/A

Can you provide the location of the switchgear as well as the nameplate voltage/amperage?

The Public Works information was available on the field visit and the Engineering Building pictures were included in the Pre-Proposal Meeting Minutes.

Airport Water Reclamation

Our maps indicate the proposed site is in a designated wetland. Can you confirm this? If so, is there an alternate site available?

The site is not within a designated wetland. The current FEMA Flood Insurance Rate Map details the site within a Zone A Floodplain, the City has completed a detailed study of the area, and the existing dirt mound where the solar field is proposed is outside of the floodplain. The City will be completing a Letter of Map Revision to remove the entire solar site out of the floodplain.

On a map, can you provide the location of the switchgear as well as the nameplate voltage/amperage?

These were available on the field visits to each site.

Have there been any environmental surveys conducted for this site?

An environmental survey was completed with the construction of the new Airport Water Reclamation Facility Expansion and there are no environmental concerns or archeological concerns with the site.

Is there a maximum system size for this site?

The City's goal is to offset a maximum of 70-80 percent of the current average monthly power demands.

Water Treatment Chino Valley
251 N. Hwy 89
On a map, can you provide the location of the switchgear as well as the nameplate voltage/amperage?

The Booster Pumps are a little different. BP #1, #2, and #6 are off the same power drop which is protected by 2-300 amp fuses per phase on the power pole. There is a circuit breaker but it is buried in the cabinet and I cannot get to it. Booster Pump #5 has a 600 AMP breaker.

All the booster pump MCCs are at the Chino Pumping facility within 75' of the substation.

Have there been any environmental surveys conducted for this site?

The City does not have any environmental surveys conducted for any Chino Valley sites. The City requires that the proposer include the necessary environmental survey for these sites.

Is there a maximum system size for this site?

The City's goal is to offset a maximum of 100 percent of the low winter monthly power demands.

Well #3
On a map, can you provide the location of the switchgear as well as the nameplate voltage/amperage?

The voltage/amperage at Well #3 is 480V 3 Phase and 800 amps. The well MCCs are in the well house at each well site.

Have there been any environmental surveys conducted for this site?

The City does not have any environmental surveys conducted for any Chino Valley sites. The City requires that the proposer include the necessary environmental survey for these sites.

Is there a maximum system size for this site?

The City's goal is to offset a maximum of 100 percent of the low winter monthly power demand.

Well #4
On a map, can you provide the location of the switchgear as well as the nameplate voltage/amperage?

The voltage/amperage at Well #4 is 480V 3 Phase and 1200 amps. The well MCCs are in the well house at each well site.

Have there been any environmental surveys conducted for this site?

The City does not have any environmental surveys conducted for any Chino Valley sites. The City requires that the proposer include the necessary environmental survey for these sites.

Is there a maximum system size for this site?

The City's goal is to offset a maximum of 100 percent of the low winter monthly power demands.

GENERAL

Will the City be able to provide answers to the questions submitted prior to December 7th? Answers to the questions will be critical to the preliminary design of the systems and will inform our bid.

The City will extend the request for proposals opening to January 7, 2016 to allow the proposers additional time to consider information supplied from the questions.

On Form E Section 4, the City requests a letter of commitment from all subcontractors. Will the City allow for a list of subcontractors without the letter?

Any subcontractors listed shall provide a letter of commitment to the project team as stated in Form E, Section 4. A letter of commitment is not a contract; it is statement of the subcontractor's commitment to perform the services subcontracted.

The Prescott Water Treatment Facility in Chino Valley appears to have 3 sites – the Facility, Well #3, and Well #4. The City provided an APS electricity bill for "Cv Ch Wells Sub E9 Hse 39". Does this bill cover all the Chino Valley/Prescott Water Treatment Facility sites? If so, could you please identify the location of the meter? If not, could you please provide the APS bills for the 2 remaining Chino Valley sites?

The APS master meter electrical bill (Cv Ch Wells Sub E9 Hse 39) covers all power usage to the Chino Valley water production facilities (including booster facility, Well #3, and Well #4 sites).

Would the City consider utilizing an electrical storage system (TESLA Powerwall storage systems are becoming cost effective)?

The City would consider this and other types of innovative and cost effective approaches to the proposal.

Please provide hourly consumption or at least the lowest amount during the day from 6am - 8pm for each meter so that we can size the system to not overproduce and send power back to the grid.

This is covered in our answers previously; the City is interested in monthly average not hourly.

The minimum project scope is for 1.25mw AC. Do you have a maximum or is it dependent on your billing consumption?

This is covered previously, 70-80 percent of monthly demand for the Airport Water Reclamation Facility and Public Works/Engineering Building, and 100 percent of winter monthly demand for the Chino Valley Water Production Facility and Wells #3 and #4.

APS may require a grid study for systems over 1MWAC. This may affect the schedule for the ITC. Do you want us to bid options that show under and over 1MWAC?

Yes, we want to see options in the proposals.

At the WWTP can you provide a schedule when the site will be available after the balancing of the land and excavation?

We estimate the construction to be completed in April.

Do you have any module or inverter preferences?

No

What is the substation interconnect voltage for the well sites? Can we interconnect 480V at each well site?

The interconnect voltage on the City's power distribution system is 7200 volts. It is a long distance to interconnect 480V between the well sites.

Are parking structures required at the engineering and public works locations?

Preferred.

Are you expecting energy savings in year one?

No, but escalators could be presented to show the impact on the total savings versus savings on day 1.

What is the conductor size of the 7200v Well distribution lines?

Leaving the substation going north the conductor size is 477 aluminum; at the northeast corner of Road 1 East, and Road 1 North, the conductor size changes to 795 aluminum. At the individual well distribution lines the conductor changes to a No. 2.

What size is the transformer in the APS substation that feeds the 7200V well distribution line?
1500 KVa

Please provide 12 months of actual bills for all proposed sites?

See Exhibit B attached.

Please provide 12 months of interval data for all proposed sites?

This information is not available.

Is the City willing to cut down or trim any trees that are shading the office building and parking lot at 430 and 433 N. Virginia Street?

The trees behind 433 North Virginia have been mostly removed and the City is willing to trim or remove additional trees.

Where exactly is the building at 429 N. Mount Vernon located? What roofing material is currently on the roof?

The meter address for 429 N. Mount Vernon includes the Engineering Department building at 430 N. Virginia Street. The roofing material includes steel web joists and is covered by an asphalt roll.

Please provide any electrical drawings that the City has for all proposed sites.

Electric drawings are included for the Airport Water Reclamation Facilities. No other electric drawings are available.

The office building at 430 and 433 appear to be on multiple parcels. APS requires all solar for a project to be on the same parcel. Is the City planning on combining these parcels to meet this requirement?

No, it would not be feasible to combine the parcels with right-of-way in between.

Are the four wells at the Chino Valley sites always running? If not, is there a set schedule that the wells are on? Do all wells run at the same time or do they alternate? We need the "run schedules" for each well.

The wells have no set schedule. The run time for the wells and boosters are determined by water demand, in the winter it is about 4MGD, in the summer it can get as high as 10.5MGD. This is why the city is considering to off-set the low winter monthly power demand.

ATTACHMENTS:

Exhibit 'A' – Electrical Drawings from the Airport Water Reclamation Facility Detailing Connection Locations for the Solar Feed for the Facility.

Exhibit 'B' – 12 months of billing for each site.

– END –

EXHIBIT B – ANNUAL MONTHLY BILLING FOR EACH SITE

1. Public Works Building – 433 N. Virginia Street
2. Engineering Building and Shops – 430 N. Virginia Street (429 North Mount Vernon)
3. Water Treatment Substation – Chino Valley
4. Airport Water Treatment Facility – 2800 Melville Road (Please note, the meter was installed last year and included less than a full start up of the facility in the beginning (to test different processes), then included both plants (old and the new) until the old plant was shut down in August of 2014; Also, the City currently has a credit with APS due to a billing error).

Re: APS Account Number 478508280
Service Address 2800 Melville Rd Ste A

At APS, we strive to provide exceptional customer service at all times, which includes accurately calculating our customers' statements. I regret to inform you that we recently discovered a billing error, and need to make you aware of corrections that will appear on your account.

Our research determined the above address was billed incorrectly for the period of February 27, 2014 through September 8, 2014. To correct our error, we have voided the original statements issued between these dates, and have now issued corrected bills as summarized on the enclosed list. As a result of our recalculations, there is a decrease in the amount that you owe, which comes to $421,197.71.

Your business is very important to us, and we sincerely apologize for our error and any inconvenience it causes you. If you have any questions, please call (602) 371–7171 or (800) 253–9405. We thank you for your understanding.

Sincerely,

Imelda N.

Imelda N.
