PROJECT UPDATE
RUNWAY 3R-21L
RUNWAY SAFETY AREA IMPROVEMENT PROJECT

Construction work is nearing completion. Starting the week of March 11th, the contractor is working to complete the final items necessary to re-open Runway 3R-21L for full use and normal operations on the new sections of the runway and taxiways.

The contractor's schedule, barring any delays caused by this weekend's weather, is to apply a sealcoat over those portions of the runway markings that have been previously obliterated to re-seal the asphalt and help prevent FOD being created by loose aggregate material. Once the seal coat is complete, the contractor will layout the new runway markings and apply the striping to the runway.

This work will require a complete closure of Runway 3R-21L between **0800 on Thursday, March 14th and 1800 on Friday, March 15th**. The airport will place the lighted closure markers ("X's") on the ends of the runway. This should be the last big push prior to opening the runway for normal operations (with the exception of the ILS which is in the FAA's court to complete and calibrate prior to placing into service). There may be other shorter closures in the weeks to come as we conduct the project final inspections and all identified punch list items are completed.

- Please use caution for barricades, heavy equipment, and other vehicles operating on the airport.
- Please remain aware of the NOTAMs for Prescott as they will be the official sources of information for airfield impacts.

If you have any questions, please feel free to contact the airport administration office at 928-777-1114 during normal business hours.

The City of Prescott appreciates your patience during this critical construction project. Once this project is completed, the users and tenants of the airport will enjoy a facility that meets all applicable FAA safety standards.

Sincerely,

Jeffrey S. Tripp

Jeffrey S. Tripp, A.A.E.
