**PROJECT UPDATE**

**Project Name:**

Cliff Rose Sewer Lift Station Upgrades

**Date:**

October 29, 2010

Cliff Rose Sewer Lift Station Upgrades: The purpose of the project is to construct a new sewer lift station and force mains across Granite Creek to the Waste Water Treatment Plant on Sundog Road. The lift station is being designed to handle current and future flows for projected growth in the Cliff Rose sewer collection area. Once the new lift station is complete, the old lift station will be refurbished as a backup station.

Olsson & Associates is the engineering consultant for the project. The engineering plans are 60% complete.
