ROADWAY PROJECT

DARBY CREEK WAY PAVEMENT RECONSTRUCTION PROJECT

NOVEMBER 1, 2015

The Darby Creek Way Pavement Reconstruction Project generally involves reconstruction of deteriorated asphalt pavement on Darby Creek Way from Golden Bear Drive to the westerly end of Darby Creek Way. Darby Creek Way is in the Stoney Creek Subdivision adjacent to the Blackhawk Subdivision where street improvements have recently been completed. Utility replacements are not anticipated, but an underground drainage system will be installed.

The engineering services contract was awarded to AZTEC Engineering on April 28, 2015. Survey and design work is underway. The engineer has submitted 100% plans and bid documents for review by staff. Construction is expected in Spring, 2016.
