PROJECT UPDATE

Project Name:

FY 2012 Chip Seal and Various Pavement Repairs Project

Date:

December 9, 2011

FY 2012 Chip Seal and Various Pavement Repairs Project: The project includes rubber chip seal on streets predominately in the Southview Subdivision, the Copper Canyon Subdivision, and the Sandretto Hills Subdivision. The project includes conventional chip seal on numerous previously unpaved streets as part of a dust suppression program in coordination with the City Field Operations Department. The project also includes pavement repairs at various locations around the city.

The contractor is Cactus Asphalt. Construction began on August 3, 2011 with the various pavement repairs the first order of work. The various pavement repairs have been completed. The chip seal portion of the project was completed on September 30, 2011. The Contractor has completed utility adjustments and final cleanup. The Contractor has minor administrative tasks to complete.
