

**CITY OF PRESCOTT  
PUBLIC WORKS DEPARTMENT**

**PROJECT UPDATE**

**Project Name:**

Rosser Street Reconstruction Phase IV

**Date:**

April 4, 2014

The Rosser Street Reconstruction Phase IV design project consists of topographic survey of street and appurtenant objects, utilities investigations, and the preparation of plans and specifications to reconstruct Rosser Street with new asphalt concrete pavement and replacement of concrete flatwork when found to be deficient, including water and sewer improvements as needed. Changeable radar signs for traffic calming will be considered with the project.

The project limits are Rosser Street from Campbell Avenue to the easterly boundary of The Meadows at Eagle Ridge Unit III subdivision.

The City advertised for Statements of Qualifications (SOQ) from engineering firms to perform design services for the project. SOQ's from four firms were received by 2:00 PM on Thursday, December 19, 2013. The SOQ's were reviewed and evaluated by a committee of City team members. Plateau Engineering was the highest ranked candidate. Contract negotiations are currently underway with Plateau Engineering.
