

ROADWAY PROJECT

VALLEJO STREET PAVING PROJECT

June 1, 2015

The Vallejo Street Paving Project generally involves the paving the unpaved portion of Vallejo Street from the end of existing pavement east of 1st Street to the end of the dirt roadway to alleviate a line of sight issue. The City has removed a portion of the rock outcropping on an emergency basis to improve roadway safety until the paving project can be conducted. More of the rock outcropping will require removal as part of the paving project. Water and gas line relocation is anticipated.

The project is currently on hold to coordinate with a private development project in the area.
