PROJECT UPDATE

Project Name:

White Spar Waterline Relocation

Date:

September 27, 2013

White Spar Waterline Relocation Project: The White Spar Waterline Relocation project, from Copper Basin Road. to Apache Drive will include the installation of new 12-inch waterline on SR89-White Spar Road from Copper Basin Road to Apache Drive in advance of the upcoming ADOT road improvement project. Additional improvements shall include installation of new water meters, fire hydrants, tie-ins to existing water mains and services, and removal of an existing 6-inch water main within the same corridor.

Construction of the new 12-inch waterline is underway. Crews have installed the new waterline from Copper Basin to Cheery Rd. Installation of a temporary waterline has been completed to keep customers in service during construction. It may be necessary to temporarily shutdown water as the new main is installed and the old main is taken out of service, residents and businesses will be notified by the contractor as to the dates and timeframe of the shutdown. Every attempt will be made to keep service disruption to a minimum.

Questions regarding the project should be addressed to the City Project Manager, Tim Sherwood at (928) 777-1130 or email to tim.sherwood@prescott-az.gov
