ROADWAY PROJECT

WICKWOOD LANE IMPROVEMENT PROJECT

September 3, 2015

Wickwood Lane Improvements Project generally consists of removal of the existing 36-inch diameter CMP culvert and replacement with three 42-inch diameter HDPE culverts with headwalls, safety railing, drainage improvements to the road and road improvements including an aggregate base course with a gravel cover.

Shephard-Wesnitzer Engineering has completed the design. The project is anticipated to be advertised for construction in October, with construction beginning later this Fall.
