PROJECT UPDATE

Project Name:

Willow Creek Dam Repairs

Date:

January 31, 2014

The Willow Creek Dam Repairs Project consists of the removal and replacement of damaged concrete surfaces on Willow Creek Dam. Project work includes saw cutting, hydro demolition concrete removal, repair and replacement of concrete surfaces with epoxy bonded concrete patches, new handrail with steps and walkway installation, and security fence installation.

The project plans and specifications are being prepared by City staff. The plans and specifications are 90% complete and under review by project team members. The project is expected to be advertised for bids in 2014.
