

# COMMUNITY MEETING

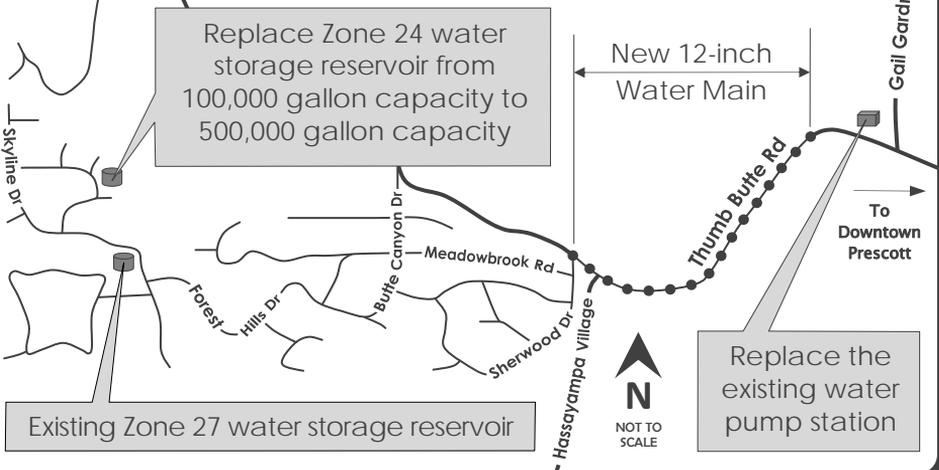

## ZONE 24 AND ZONE 27 UTILITY IMPROVEMENT PROJECT

The City of Prescott is committed to providing reliable water utility service to the citizens of Prescott. To accomplish this goal, the city is conducting an engineering analysis and design upgrades to water storage facilities, main lines, and transmission facilities. As part of the city-wide water system, these improvements will ensure adequate water delivery for existing customers, allow for future water needs, and increase the available "fire flow" needed to maintain a fire-safe community. Increased capacity will be achieved by replacing existing storage reservoirs. A location for an additional storage reservoir is also being considered. These utility upgrades enhance service to area residents and improve the reliability of the entire water utility system.

On **Tuesday, April 7, 2009 at 5:30 P.M.** the City of Prescott and design consultant, PBS&J, invite you to attend a community meeting for the Zone 24 and Zone 27 Utility Improvement Project. The community meeting will feature details on the proposed design and scheduling information. Questions or concerns from the general public will be addressed by representatives from the design firm and the City of Prescott. **Doors open at 5:30 P.M.**, and a short presentation detailing the proposed improvements will follow. For additional information, please call project staff at **(928) 541-7825** or visit **[www.prescottutilityprojects.com](http://www.prescottutilityprojects.com)**.
