

UTILITY PROJECT

TANK MAINTENANCE PROGRAM PHASE 1 – SOUTH TANK REHABILITATION

AUGUST 1, 2017

The Tank Maintenance Program generally consists of making repairs to existing water storage tanks to stop leakage and prevent future leakage.

City staff is currently working on developing standards by which repairs will be made. The first water tank programmed for rehabilitation is the South Reservoir at the southerly terminus of S. Washington Avenue.

The plans were completed by in-house staff. The construction contract was awarded to Revolution Industrial on September 13, 2016 to complete the repairs to the South Tank. Concrete repairs, surface preparation, and final coating have been completed. The water tank has been filled and is back in normal operation. The project is complete.
