

UTILITY PROJECT

Water Production & Intermediate Pump Stations Project

October 1, 2020

The design consultant, Water Works Engineers, and the Construction Manager at Risk (CMAR), Fann Environmental/Fann Contracting Joint Venture have been awarded the project. The design firm, CMAR and City staff are currently working on preliminary design concepts for the Water Production Facility and reviewing site locations for the Intermediate Pump Station. City staff is also working with Arizona Public Service on electrical needs for both facilities. City staff has completed review of the 100% Design Plans from Water Works Engineers. Project construction is anticipated to start this Winter.

The project also includes a new intermediate pump station that will be sited west of the Airport area. City staff is currently working with the Deep Well Ranch Developer on the location of the future site. The City and design team are just beginning design work for the intermediate pump station.
