

UTILITY PROJECT

Willow Lake Tributary Letter of Map Revision

November 5, 2019

JE Fuller Hydrology and Geomorphology was hired to complete a revised Letter of Map Revision (LOMR) for Willow Lake Tributary. The new flood study intent is to revise the 1-percent-annual-chance floodplain located at a point 60 feet north of Northridge Drive to a point 1,700 feet south of Bloomingdale Drive.

As a result of the LOMR, the regulatory floodway will narrow within the area of revision. In addition, the LOMR will result in an increase and a decrease in Base Flood Elevation (BFE) with a general narrowing of the 1-percent-annual-chance floodplain. The flood study has been completed and approved by FEMA. The final LOMR Maps are available at City of Prescott Public Works Office.
