

# State Route 69 Water Main Replacement Project

SUMMER 2021

The City of Prescott and their contractor, Technology Construction, are set to begin a water main replacement project the week of July 5, 2021. The project consists of removing and replacing the water main paralleling the northern side of State Route 69, from the western edge of Holiday Drive to the U-Haul Store, as highlighted in the map below. The existing 8-inch water main will be partially removed and abandoned. To minimize impacts, night work will be required to install a temporary concrete barrier and complete water main installation at driveway and roadway crossings.

Once complete, this project will increase water system reliability by upgrading the existing infrastructure. The project is scheduled for completion in fall 2021.

The City is dedicated to keeping the traveling public, businesses, and residents informed of potential construction impacts throughout the project.
