

UTILITY PROJECT

Water Production Facility & Intermediate Pump Stations

March 8, 2023

The project design consultant, Water Works Engineers, and the Construction Manager at Risk (CMAR) contractor, Fann Environmental LLC / Fann Contracting, Inc. joint venture, have been awarded the project. The project consists of two locations: the City's Water Production Facility (WPF) located in Chino Valley, and a new Intermediate Pump Station (IPS) to be located west of Willow Creek Road near the Airport. The CMAR contractor and City have agreed on the final construction costs and the contract for construction.

Chino Water Production Facility:

The pump building is nearing completion. Once completed, the new facility will be on hold until the Immediate Pump Station is completed.

Intermediate Pump Station:

The CMAR subcontractor DN Tanks has completed the two (2), six (6) million-gallon prestressed concrete tanks. The CMAR Contractor Fann Environmental LLC / Fann Contracting, Inc. joint venture has completed the offsite water lines and has begun the underground mechanical piping for the IPS.

City staff is also working with Arizona Public Service (APS) on electrical needs for both facilities.
