

# ROADWAY PROJECT

## Streets Division Snow Equipment Facility Grading Project

***OCTOBER 5, 2021***

The project generally consists of the demolition of four decommissioned sludge drying beds at the Wastewater Treatment Plant on Sundog Ranch Road, and constructing a building pad for future use by the Public Works Streets Division for snow removal equipment. The project also includes crushing of the removed concrete and using this, and other material, to place fill for the future building pad.

The project was designed by the Public Works In-House Design Team. The construction contract was awarded to Earth Resources, LLC. Construction is complete. Final completion is based on final geotechnical reporting and completed documents.
