

UTILITY PROJECT

Airport Ruger Road Sewer Trunk Main Upsizing Project

SEPTEMBER 6, 2022

Lyon Engineering & Surveying, Inc. has been awarded the engineering and design contract for the project. With the preliminary alignment set, the Engineer has been requested to phase the design of the project to coincide with the future expansion of the airport. The phase one portion of the design is moving ahead and includes a new sewer trunk main from the Airport Treatment Plant to the new Melville Road Improvements.

The pavement improvements are complete on Melville Road. Utility adjustments, striping and signage will be complete later this month.

The sewer installation has begun. The contractor will be starting at the Airport Wastewater Treatment Facility, and progressing northerly towards the Airport. Project substantial completion is anticipated for mid-October.
