

UTILITY PROJECT

Chino Production Well Rehabilitation Program Well No. 3

FEBRUARY 7, 2023

Production Well No. 3 is one of the key components in the City's water production facilities. The well house, the electrical controls, and the HVAC components are beyond their useful service life and require rehabilitation and/or replacement. Production Well No. 3 is located in Chino Valley, near the intersection of Road 2 North and Road 1 East. Elements of the project include the rehabilitation of the well itself, the well site, and associated facilities and equipment.

The City's contractor, Fann Environmental LLC has completed the site and building demolition. The new well building underground mechanical piping is still on going. Building foundation and stem walls should be completed by the end of the month.
