## Chino Production Well Rehabilitation Program Well No. 3

***MARCH 8, 2023***

Production Well No. 3 is one of the key components in the City's water production facilities. The well house, the electrical controls, and the HVAC components are beyond their useful service life and require rehabilitation and/or replacement. Production Well No. 3 is located in Chino Valley, near the intersection of Road 2 North and Road 1 East. Elements of the project include the rehabilitation of the well itself, the well site, and associated facilities and equipment.

The City's contractor, Fann Environmental LLC, has completed the site and building demolition. The new well building underground mechanical piping is still on going. Well condition evaluation and the sanitary seal have been completed. Construction of the building foundation and stem walls are anticipated for later this month.
