

ROADWAY PROJECT

PUBLIC WORKS

Solid Waste Maintenance Building

AUGUST 5, 2022

The Solid Waste Equipment Mechanic inspects, maintains, and repairs vehicles, trucks, heavy equipment and other associated equipment utilized in Solid Waste operations. For the past fifteen years, working conditions have required working on the ground in an outdoor environment. A dedicated maintenance building will promote a safer work environment for City employees, while increasing efficiency and productivity.

The construction contract was awarded to Danson Construction, LLC at the March 8, 2022, City Council meeting. Construction started on July 27, 2022.
